

Stage Brake NEMA 23 Sizes

Designed with ease of installation, precision and security in mind, the Nexen Stage Brake provides simple mounting procedures that permit both vertical and horizontal holding for installation on the non-driven end of ball screw stages. This type of installation reduces the risks associated with motor shaft/coupling failure. A true zero backlash brake, it also allows high lead on ball screw stages without fear of back-drive.

- Emergency holding and stopping for increased safety
- Designed for vertical and horizontal applications
- Simple pneumatic valve for easy installation
- Zero backlash allows for precision holding
- 2.25 Nm [20 in-lb] of torque
- Economical
